

# ROCKY GULLY

In December 2007 STRACON was awarded by Southern Alpine Recreation Ltd. to construct the Rocky Gully Reservoir at Coronet Peak Ski Field in Queenstown, New Zealand.

The project comprises the development of a natural depression, including embankment construction to create a geomembrane lined snow making reservoir.

The objective of this contract is to construct the earthworks, drainage, pipe work and to coordinate the installation of geotextile and a geomembrane liner.
